- Locking feature when height has been adjusted
- Counterbalanced to provide effortless movement

Anesthesia Mounting Features

Cable Management
Discrete and sleek cable management maintains a tidy workspace and encourages excellent infection control.

Custom Solutions
A variety of options are available to integrate multiple monitors, an IT charting station or additional peripherals. We work with your facility to accommodate specific needs and unique requirements.
Pre-Assembled
All of our products come pre-assembled to save you the time and cost that it takes to assemble the units. Simply slide the dovetail or MRS adapter into the track on the machine.

Improve Flexibility
Increase the range of motion for your IT charting station or patient monitor by adding an extension, but don't compromise the stability. Extensions come in a variety of sizes from 6" to 19" (15.24 cm to 48.26 cm).

Easy to Use
Adjust the IT charting station or patient monitor with one hand while working! All of our height adjustable units are counterbalanced to improve workflow and allow the clinician to focus on patient care.

Monitor Compatibility
