Safer with Integrated RFID Reader

Better Workflow

Why Use RFID for Your Workflow

- Increase productivity by allowing access to computers and applications with a single wave of a badge.
- Secure access to information while minimizing barriers to data.
- Fast and error-free identification.
- Maintain password complexity while dramatically decreasing time spent on resetting and retrieving forgotten passwords by IT staff.
- Leverage existing RFID cards that are already in use for door access system.
- Integrated RFID reader allows for easy cleaning, less cluttered workspace, and less cables to manage.
- Control access to items requiring high levels of control and compliance.
- A wave of the card determines authorization.

Before

After

RFID Compatibility

RFID Card Compatibility

- If you are currently using RFID cards for door access or time cards, these cards can be integrated into use for computer and network log on.
- Compatible with Windows CE®/2000®/XP®/ Vista®/7®, Macintosh®, Solaris™, Sun Ray™ thin clients, and Linux.
- Medical/Healthcare HIPAA Compatible: Meets HIPAA requirements when used as a log on reader.
- Allow the option for users to use their NFC enabled device for authentication.

Single Sign On and Virtualization

- Compatible with Imprivata, Microsoft, Cerner, Epic and others.
- Add versatility to employee ID badges. Use the same badge for door entry, computer log on, printing usage, etc.
- Streamline access and log on for virtual desktops.

Options for the RFID Enabled Products

- The RFID enabled Hummingbird can be ordered with new RFID credentials (cards, fobs, bracelets, etc.) each bearing a unique ID number.
- Amico can match the RFID reader to your existing credentials if you provide one of the following:
 - Credential system specs
 - Sample credential (an actual RFID card mailed to us)
 - A good picture of the logo and numbers on the access card
