

### Product Description

The 2' x 4' Ceiling Panel is a non-ferrous, LED light troffer for use within a ceiling grid for general lighting or as an interior architectural back-light for image illumination. The 2' x 4' Ceiling Panel was designed specifically for use in MRI scan rooms. Contains no on-board electronics therefore will not interfere with MRI imaging. Certified to meet MRI vendor EMI requirements. MRI applications require EMI free emissions for specific frequency bands. All drive circuitry employs linear regulation and no pulse width modulation (PWM\*).
